# WHAT IS METAFARM?

Metafarm token is more than a metaverse based platform for advanced cryptofinancial products, powered by the Metis ecosystem. Metafarm is the easiest way to explore the Metaverse and DEFI ecosystem with your assets on the Metis Ecosystem. Here, you can farm new tokens with minimal transaction fees and lower latency than any dapp on Ethereum, all while knowing that you're getting a fair price. Additionally, you can also stake your NFTs on Metafarm. Metafarm does not hold your assets. You always retain full ownership of your account and all your synthetic assets.

## WHO CREATED METAFARM ?

Metafarm is a meta-defi platform built on the Metis Ecosystem. Our team are mostly anonymous, born from the DeFi Community. We aim at becoming a Metaverse Decentralized Autonomous Organisation and we are actively working towards that goal.

# WHY METISDAO ECOSYSTEM?

Metis is building an easy-to-use, highly scalable, low-cost, and fully functional Layer 2 framework (Metis Rollup) to fully support the application and business migration from Web 2.0 to Web 3.0.

Metis' goal is to make building dApps and DACs on its platform so easy to do, even total blockchain novices can make it happen in a matter of minutes. Metis helps dapp developers speed up smart contract development and increase performance.

Metis is EVM-compatible and allows builders to make use of Ethereum's existing developer tools.

**META FARM**

## WHO RUNS METAFARM?

Currently most of the decisions are taken by the community, but we expect to be able to turn this into a DAO-governed model as soon as possible!

# METAFARM STAKE

Metafarm staking is a multi-vendor platform with in-built wallet for stakers, staking of tokens and NFT's, the simplest method to earn free tokens.

You only need to stake \$MTF and gain tokens/NFTs. We'll also have dedicated pools where you may stake tokens and non-fungible tokens other than \$MTF

Features of Staking Platform

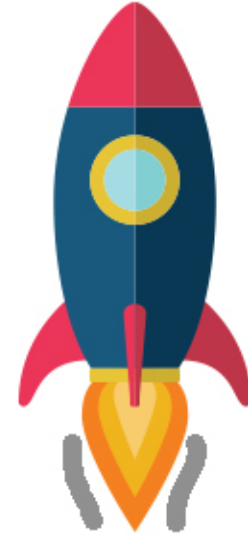

1. Stake MTF tokens with High APY to earn more tokens
2. Stake others tokens other than MTF
3. Staking of NFT to earn more tokens once our NFT marketplace is live

META FARM

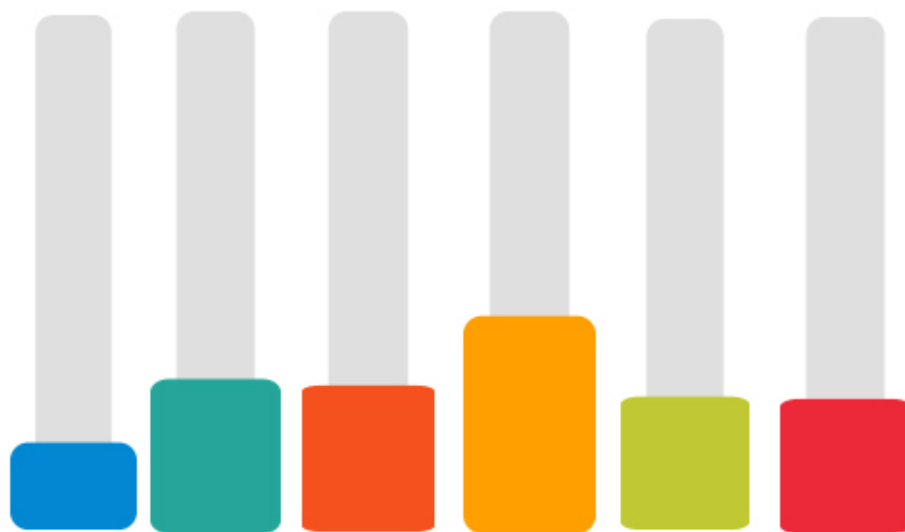

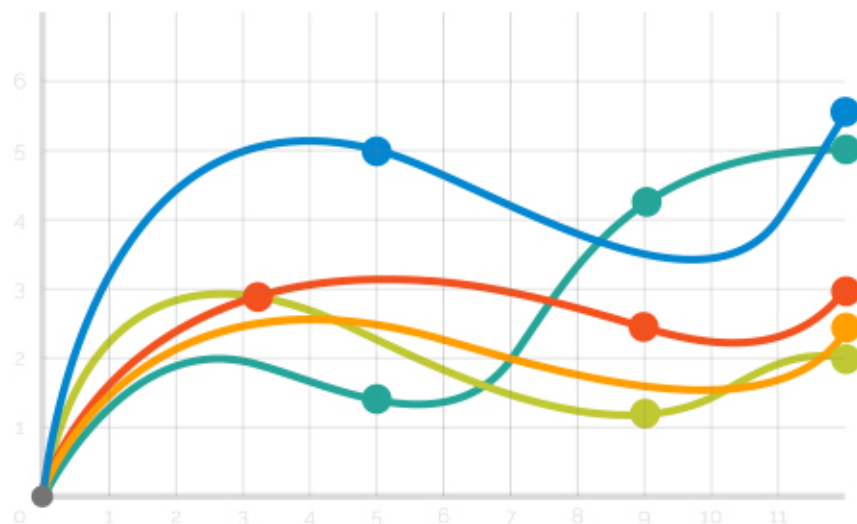

# METAFARM LAUNCHPAD

For our IDO'S, Community will vote for Projects to raise IDO'S .and we set aside a part of the IDO tokens for our investors. Your tier determines how much you may "buy out," which is simple: you must have enough tokens in your wallet (above the threshold) in order for the snapshot to be whitelisted for IDO.

You will have a limited amount of time to acquire your allocation once the IDO date approaches. If any tokens are left over after the first round and the second round begins, anyone can buy them.

# TOKENOMICS

- TEAM -10%
- MARKETING -20%
- STAKING AND FARMING -20%
- PRESALE -20%
- COMMUNITY ALLOCATION -10%
- LIQUIDITY -20%

TOTAL SUPPLY : 50MILLION

META FARM

# OUR VISION

Few have access to advanced tools & products in the existing financial system. We believe in empowering more traders, in more places, with powerful, transparent, and fair financial products. Metafarm has set out to serve the community at the frontiers of DeFi by innovating, building fast and most importantly, building securely. The ultimate goal is to build a platform, that provides users with a true 'one-stop-shop' DeFi experience.

Metafarm is a platform with features such as Stake, farm, Launchpad, Dex and earn in app collectibles in our all in one platform. Users of the Platform will have the ability to immerse themselves into a fully integrated, highly accessible DeFi Platform.
